Release Summary: Week of February 9, 2026

Core Building Operations

Work Orders

Read-only vendor invoices

Prism AI

Operational Intelligence

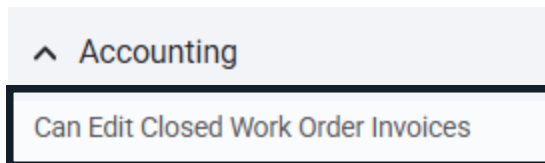

Improvements to Prism AI's Operational Intelligence

Work Orders: Vendor Invoices Read-Only Protection

Users **without** the "Can Edit Closed Work Order Invoices" Accounting permission can now view vendor invoice information on closed work orders in read-only mode.

This ensures financial data remains accessible for reference while preventing unauthorized modifications to invoices that have been processed in accounting, with other work order fields remaining editable as appropriate.

View Vendor Invoice

ⓘ The work order associated with this invoice has been closed.

Status	Date Created
Pending	03/18/2025
Invoice Number	Amount Total: \$100
775566	\$80.00

Prism AI: Operational Intelligence Improvements

The below improvements to Prism's Operational Intelligence create a more intuitive, efficient experience for property management teams.

- **Smart Suggestions** – Get personalized question recommendations based on your role and access level
- **Seamless Navigation** – Move between properties without losing context or workflow continuity
- **Clear Error Messages** – Receive helpful notifications when system processes are busy
- **Advanced Processing** – Ask complex questions and get better answers with upgraded intelligence
- **Faster Performance** – Experience significantly improved response times with optimized processing
- **Better Property Matching** – Find similar buildings more accurately with enhanced search logic

Welcome back, Prism University!
